SUMMARY

Computer Science undergraduate experienced in building AI-driven, web, and mobile applications that solve real-world problems. Developed production-ready projects in Swift, Python, and Azure, improving efficiency by 40% and enhancing user experience. Skilled in UX design, computer vision, and full-stack development, with experience leading technical initiatives and collaborating cross-functionally. Eager to create innovative, efficient, human-centered software solutions.

TECHNICAL SKILLS

Languages/Operating Systems: Java, Python, C, HTML, CSS, Swift, React, UNIX, Linux

Tools: VSCode, Microsoft Azure, Blender, Git, GitHub, Anaconda, Vercel, YOLO, Xcode, Figma, MongoDB

Skills: Design Thinking, Problem-Solving, Project Management, Machine Learning Fundamentals

PROJECTS

VitalTrack AI | *Xcode, Swift, Figma* Feb 2025 – May 2025

- Designed and implemented Figma-based interfaces in Swift for an AI-powered health monitoring app.
- Built frontend to process wearable and medical data, enabling personalized insights and early anomaly detection.
- Enabled personalized insights, early anomaly detection, and medication reminders to support healthcare decisions.

Trash Trends Venture Project | *YOLO, Python, Anaconda, VS Code* Aug 2024 – Jan 2025

- Gained hands-on experience in computer vision and implemented real-time object detection using YOLO.
- Utilized Python and drone technology for computer vision to track urban waste patterns.
- Integrated drone imagery with YOLO's object detection capabilities, improving tracking accuracy by 25%.

META Web Application | *Microsoft Azure, HTML, CSS* May 2024 – Aug 2024

- Built a triage-assistance web app using Azure and AI to speed up emergency response decisions.
- Integrated Azure Computer Vision API under Microsoft Data Architect mentorship for image-based triage.
- Enhanced triage accuracy by 50% using an emotion-aware AI model developed from scratch.

FinSure Website | *HTML, CSS, Node.js, MongoDB, Vercel* Nov 2024

- Developed a financial services web app for under-banked users to build credit and manage accounts.
- Implemented front-end interfaces with HTML/CSS focusing on easy accessibility through transparent design.
- Integrated MongoDB Atlas database with Node.js backend so user data could be stored and retrieved.

PROFESSIONAL EXPERIENCE

Kappa Theta Pi Richardson, TX

Software Developer, Director of Membership Jan 2025 – Present

- Led recruitment efforts and designed onboarding initiatives, growing and engaging the member base by over 70%.
- Developed software solutions for internal tools and collaborative technical projects using Swift and Xcode.
- Primarily contributed to VitalTrack AI and Annual-Report-AI, an AI-powered PDF chatbot using FastAPI and LangChain for HackAI 2025, enabling contextual question-answering from document uploads

Uniqlo Frisco, TX

Retail Sales Associate Oct 2024 – Mar 2025

- Assisted customers throughout the store and ensured an efficient, fast, and positive shopping experience.
- Rotated across multiple roles including cashiering, shipment processing, online order pickups, and floor sales.
- Analyzed weekly sales performance to identify trends and set daily and weekly sales goals.

EDUCATION

The University of Texas at Dallas - Comet Transfer Scholarship

Bachelor of Science, Computer Science

Richardson, TX
Expected Graduation: May 2027
