EDUCATION

The University of Texas at Dallas – Comet Transfer Scholar

Richardson, TX

B.S. in Computer Science, Dean's List: Fall 2023, Fall 2025

Expected Graduation: May 2027

TECHNICAL SKILLS

Languages/Operating Systems: Python, Java, SQL, C, JavaScript, JSON, HTML/CSS, Swift, UNIX, Linux

Data & AI/ML: LangChain, Gemini API, Cortex Code (Coco), YOLO, FastAPI, MongoDB Atlas, Streamlit, Anaconda

Frameworks & Tools: React, Node.js, Spring Boot, JUnit 5, Mockito, Gradle, Git, GitHub, GitLab, Microsoft Azure, AWS Amplify, Vercel, Xcode

PROFESSIONAL EXPERIENCE

Snowflake

Dublin, CA

Software Engineering Intern – ET Applications

May 2026 – Present

- Designed and built an automated regression testing framework for Snowflake's internal revenue recognition pipeline (ASC 606), enabling zero-code test creation via JSON fixture files that auto-discover and execute without modifying test classes.
- Architected fixture-based testing across 6 services (Workday, Salesforce, Billing Engine, RightRev, combined Pipeline, Affiliate Transfer) covering 5 contract lifecycle scenarios.
- Achieved 100% field-level detection rate across 24+ test cases, validated by injecting 40+ edge case mutations with every regression caught.
- Built a Streamlit diagnostic dashboard that parses JUnit XML results and maps stack trace line numbers to field names, reducing regression detection time from weeks of manual QA to seconds.

Kappa Theta Pi, Mu Chapter

Richardson, TX

Software Developer, Director of Membership, Project Lead

Jan 2025 – Present

- Developed full-stack applications and internal tools using React, FastAPI, Node.js, Swift, and MongoDB Atlas for technical projects and organizational operations.
- Built AI-powered document processing applications leveraging LangChain and vector-based semantic retrieval to enable contextual question-answering from uploaded PDFs.
- Led cross-functional student engineering teams through project planning, development, testing, and deployment for hackathons and chapter initiatives.
- Directed recruitment and onboarding initiatives that increased chapter membership and engagement by over 70%.

PROJECTS

RagBot | React, Node.js, MongoDB Atlas, Gemini API, LangChain

Dec 2025 – Present

- Designed a Retrieval-Augmented Generation pipeline using document chunking and embedding-based semantic search to ground LLM responses in source documents.
- Used MongoDB Atlas to store processed document data and retrieve relevant sections for LLM responses.
- Built a full-stack app using React and Node.js to support document upload, indexing, and real-time querying.

Trash Trends Venture Project | YOLO, Python, Anaconda, VS Code

Aug 2025 – Jan 2026

- Utilized Python and drone technology for computer vision to track urban waste patterns.
- Trained and fine-tuned a YOLO model on custom-labeled drone imagery, improving detection accuracy by 50% and tracking accuracy by 25%.

LEADERSHIP

Phi Gamma Delta (FIJI), Tau Delta Chapter

Richardson, TX

Vice President & Treasurer, Former Philanthropy Chair

Jan 2025 – Present

- Organized and executed philanthropy events raising over \$1,000 for charitable causes.
- Managed chapter finances and budget planning, overseeing financial operations for 50+ active members.
- Awarded the **2026 Persistence Scholarship** by Phi Gamma Delta in recognition of persistence to the chapter.
